

Sprague Products - Gas Booster, Test Stands

Sprague Products

Boig and Hill carries a wide array of Sprague products. These include the Sprague gas booster, Sprague test stands, pumps, and pump parts. [Browse our catalog](#) [1] to find out more about the Sprague products you are looking for. You can also contact us for information on Sprague products, as well as the other lines we carry, such as the [Watson McDaniel pressure regulating valve](#) [2] and [Farris safety relief valves](#) [3].

Sprague Gas Booster

The Sprague gas booster has industrial applications including charging accumulators, inflating high pressure tires or charging shock struts from lower pressure supply sources, the transferring of gas from a supply cylinder to another container or the actuating of air chucks in machine tools. Where production machinery or test setups require higher air pressures, the Sprague gas booster can provide the extra muscle needed to operate the equipment.

Sprague Test Stands

Sprague test stands come in different models, such as the HSU-1100 (S-440). This Sprague test stand model includes the S-216-J-()-SS pump, air filter, pressure regulator and lubricator, air shut-off valve, muffler, liquid bleed valve, air pressure gauge, and liquid-filled pressure gauge with quick disconnect fitting. Another model is the HSU-1400 (S-216-J), with a 15" square tubular frame.
