### Select from Standard to High Performance Ball Valves

**Worcester ball valves** and controls are used in numerous industries and come in a wide range of sizes and performance levels to accommodate the requirements of any industry. Worcester ball valves range in size from 3/4" to 10" and are available to use as standard process valves, specials service valves, and high-performance ball valves. Worcester controls also come in a variety of sizes for positioners, round port control valves, and CPT Characterized Seat Control Valves. Whether in the food or beverage industry or chemical and petrochemical industry, we will find you the **Worcester Controls** product suitable to your needs.

## **Worcester Ball Valves**

**3-piece Valves - Series 44, Series 59, Series 45; Multiple soft & metal seat options**

**Flanged Valves - Series 51/52, Series 82&83, AF 82&83 fire safe by design, Series 818/828**

**Wafer Valves - Series 151 and 301 suitable for steam processes**

**Diverter Valves - Directional ball valves, series D44/D4, D51, 18/19 - multi-port in 3-piece or flanged design**

## **STANDARD FLANGED BALL VALVES**

One of the main benefits of Worcester Standard Flanged Ball Valves is that they are extremely durable. With there being no need for replacing O ring seals, which often cause problems, this allows you to save time and money when it comes to maintenance. A further bonus in regards to cost-saving is that Worcester Standard Flanged valves can handle high-pressure systems, which is why many people use them in these environments.

## **Special Service Worcester Ball Valves:**

**Fugitive Emissions - Series 94, 94-150, 94-300, 94-600**

**Chlorine - Series CL94, CL44, CL 51/52**

**Firesafe - Series AF 44, FZ44, AF 51/42, FZ 51/52, AF94, FZ 94, AF 818/828, EAF 818/828**

**Cryogenic - Series C4, C44, and C51**

**High Purity - WK44, WK74, WK70**

**High Pressure - Series 4, H44, PT High-per Mizer, H71 Hydromizer**

**Tank Bottom - Flush, tank bottom drain valves**

**Control - Series CPT characterized seat control valve with a revolutionary patented design**

## **Worcester Ball Valves By Application**

Worcester ball valves, actuators, and controls serve a wide range of industries including chemical and petrochemical, pulp and paper, pharmaceutical and biotech, food and beverage, rubber and plastics, oil production, steam, and thermal. Specialty ball valves handle cryogenic high pressure steam, toxic fluids, high pressure steam diverter, batch cooking, diverter or sampling duty, high purity gases for microchip manufacturing, and high cycle production processes.

## **Worcester Series 44**

ball valve design in the industry, are now better than ever. Major research, design, and the testing program brings you a new valve, designed to ANSI and DIN specifications B16.34 specifications with advanced seal technology and body mount bracket design. This means a very strong, tough valve that can handle pressure and unforeseen piping strains with a stem seal that extends operational cycle life and a standardized overall design that keeps parts inventory to a minimum. Then there's documentation. B16.34 means complete traceability of assembly and testing procedures, heat codes, and foundry identification. Full Certified Material Test Reports (CMTRs) on pressure vessel parts are optionally available. Valve identification is provided on a stainless steel nameplate meeting MSS SP-25.
