Automation and monitoring.

High-pressure systems can be automated easily and effectively with NOVA SWISS valves with pneumatic actuators. The valve bodies and the sealing system are identical to those of the hand-operated valves, and afford the same advantages.

A mechanical position indicator gives indication as to whether the valve is in the actuated condition or not.

For electronic monitoring and control, the valves can be equipped with proximity switches or electrical contacts. Combined visual and electronic position indicating devices contribute substantially to high operating reliability.

Item Name	Air Operated Valve	Connection Type	English
Connections	MPCT	Pressure Rating [kpsi]	20
Pressure Rating [bar]	1380	Tube Diameter [inches]	9/16
Tube Diameter [mm]	14.3	Orifice [inches]	0.3
Orifice [mm]	7.5	Note	Please contact the company for 1" and 3/4" valves
